U.S. Patent and Trademark Office PTO-326 (Rev. 11/00)

Part of Paper No.

Serial No. 10/051,211

Art Unit 1762

- 1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
- I. Claims 1-14, drawn to a laser ablation coating method using a first magnetic field to focus the plume and a second magnetic field to direct charged species to the substrate to make a thin film, classified in Class 427, subclass 596+.
- II. Claims 15-40, drawn to a magnetic pulsed laser deposition apparatus, classified in Class 219 or 118 or 204, subclass 121.6+, or (726, 50.1 or 641), or 298.16+, respectively.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can use a different apparatus, since it does not require the use of a pulsed laser, while the apparatus is directed to only pulsed lasers as indicated by the independent claim preambles. Furthermore, the apparatus may be used for different processes, i.e. it need not be used to form a coating that is a thin film; rather thick films or particulate materials could be formed using the apparatus.

Art Unit 1762

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter; restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

- 4. A telephone call was made to Edward Ellis on June 2 and 3, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Ellis requested that the restriction requirement be mailed.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6. Any inquiry concerning this communication should be directed to M. L. Padgett from Monday through Friday from about 8 A.M. to 4:30 P.M. at telephone number (703) 308-2336 and FAX #703
